## Key features

- Available for all Vision systems
- Remote access to database and analysis results
- View digital slides, validation and reports
- Full Vision software interface
- Remote consultations

---

**Vision Remote** is an additional administrative module, available for all Vision kits. Allows to perform access to the database from a remote location.

Vision Remote is truly beneficial for specialists, professionals and managers who get rid of the manual routine and slide scanning.

Results overview, validation, reports and remote consulting are available from the working place, without physical presence in the laboratory.

Remote access to database and analysis results is provided using full Vision software interface.

Pre-classification has to be validated by the specialist reviewing the galleries of cells.

Please check the intended use and the registration in your local regulation.

Depending on the regulations of the respective region, some products may be used for research purpose only.

We reserve the right to change specification without notice.
